

# AVE VAPERIZA SMOKE MACHINE

## START UP GUIDE

### STEP 1:

Unpack machine carefully.  
Ensure you have recieved all the included components and there has been no damage or leakage in transport.

### STEP 2:

Ensure the machines hose is threaded through the additional cap included and brass conical filter is attached to inlet hose.

*PLEASE NOTE : DO NOT ATTEMPT TO USE MACHINE WITHOUT BRASS FILTER, THIS WILL RESULT IN DAMAGING THE MACHINE.*

### STEP 3:

Undo the cap on top of the liquid resevoir and attach the additonal cap and hose, making sure the hose and filter are completely emersed in the liquid.

### STEP 4:

Plug both the remote control and the power lead into the unit, and switch on.

### STEP 5:

Wait for the machine to complete its designated heat-up time, this can take between 5 - 10 mins.

*PLEASE NOTE : MACHINE USES A HEATING CYCLE TO ALLOW FOR SAFE USE, THE MACHINE WILL NOT EMIT SMOKE DURING THIS CYCLE*

### STEP 6:

Once heat-up time is complete, Green LED's will illuminate on the remote control, press and hold down the Red button to emit smoke effect.
