

The Foxgear JEENIE Analog Guitar Interface is **the first completely Analog Simulator** that includes Amplifier, Cabinet and Microphone simulations which will enhance your pedalboard. Absolutely the perfect pedal for home practice or recording.

All you have to do you is connect your favorite pedals in front of the JEENIE or maybe a backing track from your phone in the Aux Input, and enjoy the highest sound quality out of your Rig with to either your favorite Headphones, or active speakers system. Fast, Easy, Incredible Sound Quality. Your devices are accepted into a pure Class-A FET preamp section that perfectly reproduces the sound and feel of a Tube amplifier. It enriches your tone with a dynamic, organic, harmonic and touch responsive sound just like your favorite Amp.

The Adaptive Tone Stack features an Active Full 3 band EQ that mimics different Amps Tone Stacks to get that "tone" you love. The RIG selector completes the simulation adding Cab and Microphone responses in a very Individual way:

JEENIE is based on a proprietary circuit called **ADEQ**, a 20 bands **Analog** Active EQ section that is Digitally controlled to create 5 Different presets of AMP+CAB+MIC complete simulation, with the best accuracy and respect of your original signal.

PLEASE NOTE:

The JEENIE is a real amplifier, and it need Ground connection. We included a proper PSU in the box. ONLY if you connect it to a Mixing console, or Home Hi-Fi. or Active Speakers.. (anything that already has a ground connection) Use a normal pedal PSU without Ground, to avoid ground loop noise.

FUNCTIONS:

Tech info:

Power In	9 to 12VDC (negative TIP)
Consumption at 9V	70mA
Input Impedance	<=1M Ohm
Output Impedance	<=10K Ohm
Lunghezza (Lenght)	120mm. (4,7")
Larghezza (Width)	60mm. (2,3")
Altezza (Height)	30mm. (1,2")
Peso (Weight)	0,2Kg. (0,4lbs)
