GPB SERIES PEDALBOARDS

GPB series Pedalboards are built with structural mechanics, hylology, ergonomics in mind, our goal is optimal user-friendliness.

Bring in a whole new method of fastening the pedals, say, fasten the pedals quickly. With specific tools attached, easy to operate.

With collapsible and hidden under-chassis,

Made of aluminum alloy, can sustain violent trample.

They feature ergonomics & quite user-friendly.

All edge protectors design, helps protect against being scratched.
The surface of the metal has undergone oxidation treatment, firm & doesn't discolor.

Put the power pack in the middle of the collapsible under-chassis.

Lock the power mounting brackets on the aluminum alloy, and tighten the screws properly so as to secure the power pack.

Building blocks structure, various sizes are available.

Our engineers have also specially designed a large bag for guitar performers, which is convenient, lightweight, durable, and with extra pockets.
